KS DECKBOX

KS-Daybox can carry most of the day touring equipment safely and watertight on top of the kayak deck. Wallet, camera, keys, snacks, drink, sunglasses, headscarf and most of your daily equipments

Deckbox is placed under the deck bungees in front of the paddler for easy usage. It does not require separate installation so it can be placed and removed anytime you use a kayak. Therefore it is handy equipment as a additional storage in your personal kayak or as optional equipment in rental station.

Deckbox has integrated bungee to fix a cellphone or sport device easily in sight in top of the hatch cover.
